APPLICATION NO	PA/2023/616			
APPLICANT	Patrick Gilboy			
DEVELOPMENT	Planning permission to erect a detached dwelling and garage			
LOCATION	Elsham House, Brigg Road, Wrawby, DN20 8RH			
PARISH	WRAWBY			
WARD	Brigg and Wolds			
CASE OFFICER	Paul Skelton			
SUMMARY RECOMMENDATION	Approve with conditions			
REASONS FOR REFERENCE TO COMMITTEE	Departure from the development plan			
POLICIES				
National Planning Policy	v Framework:			
2 Achieving sustainable development				
4 Decision-making				
5 Delivering a sufficient supply of homes				
12 Achieving well-designed places				
14 Meeting the challenge of climate change, flooding and coastal change				
15 Conserving and enhan	cing the natural environment			
North Lincolnshire Loca	l Plan:			
H5 New housing developm	nent			
H8 Housing design and housing mix				

- RD2 Development in the open countryside
- T1 Location of development
- T2 Access to development
- T19 Car parking provision and standards
- LC7 Landscape protection
- DS1 General requirements

DS14 Foul sewage and surface water drainage

DS16 Flood risk

## North Lincolnshire Core Strategy:

- CS1 Spatial strategy for North Lincolnshire
- CS2 Delivering more sustainable development
- CS3 Development limits
- CS5 Delivering quality design in North Lincolnshire
- CS7 Overall housing provision
- CS8 Spatial distribution of housing sites
- CS9 Affordable housing
- CS16 North Lincolnshire's landscape, greenspace and waterscape
- **CS17** Biodiversity
- CS18 Sustainable resource use and climate change
- CS19 Flood risk
- CS20 Sustainable waste management
- CS22 Community facilities and services
- CS23 Sport, recreation and open space

## Housing and Employment Land Allocations DPD:

PS1 Presumption in favour of sustainable development

Inset 47 - Wrawby

**New North LincoInshire Local Plan Submission:** The new North LincoInshire Local Plan was submitted for public examination to the Planning Inspectorate on 11 November 2022. Examination of the Plan has therefore commenced, although public hearing sessions are not anticipated until early 2024.

The Submitted North Lincolnshire Local Plan can be given some weight as a material planning consideration in the determination of planning applications. The relevant policies concerning this application are:

SS1 Presumption in favour of sustainable development

SS2 Spatial strategy for North Lincolnshire

SS3 Development principles

- SS5 Overall housing provision
- SS6 Spatial distribution of housing sites
- SS11 Development limits
- H2 Housing mix and density
- H3 Affordable housing
- H11 Backland and tandem development
- RD1 Supporting sustainable development in the countryside
- DQE1 Protection of landscape, townscape and views
- DQE3 Biodiversity and geodiversity
- DQE5 Managing flood risk
- DQE6 Sustainable drainage systems
- DQE7 Climate change and low carbon living
- DQE12 Protection of trees, woodland and hedgerows
- CSC1 Health and wellbeing
- CSC3 Protection and provision of open space, sports and recreational facilities
- CSC10 Community facilities and services
- WAS6 Waste management in development
- T1 Promoting sustainable transport
- T3 New development and transport
- T4 Parking
- DM1 General requirements
- DM3 Environmental protection
- DM4 Telecommunications and broadband
- ID1 Delivering infrastructure

#### CONSULTATIONS

Highways: No objection subject to conditions.

LLFA Drainage: No objection subject to a condition and informatives.

**Environmental Protection:** Potential pollutants have been identified on site. No objection subject to a contaminated land condition.

## PARISH COUNCIL

No objections.

## PUBLICITY

Site notices were displayed initially and following amendments to the scheme. One response was received objecting strongly to the bar/poolroom with master bedroom and balcony part of the house which would be located 13 feet away from their boundary and would intrude on the privacy of their rear garden and the amenity value.

Following display of the second notice, pursuant to the amended scheme which has addressed a number of the original concerns, no objections have been received.

#### ASSESSMENT

#### The site and its location

The site comprises a parcel of land to the rear (north) of the property known as Orchard Rise. The site is just outside the development boundary of Wrawby and within flood zone 1.

To the west is a property known as Mayfield House which is separated from the site by a mature hedgerow. To the east is a large property (Priory Garth), which is set on mature grounds, with a dense, high hedgerow on the common boundary.

To the north is land which has been subject, along with the application site, to a number of planning permissions for residential development. Outline planning permission was granted for four residential units on this site in 2018, but this permission has lapsed (PA/2018/1093). Subsequently, outline planning permission reference PA/2021/1850 'to erect four detached dwellings with appearance, landscaping and access reserved for subsequent consideration (part of access roadway completed)' was granted in February 2022. This permission remains extant.

More recently reserved matters application PA/2022/1586 was submitted; however, due to technical issues relating to differences between that application and the outline, the application was withdrawn. A full planning application was submitted (PA/2022/2200) on one of the other plots on the wider site but this has not been proceeded with at this time due to concerns regarding the design.

A new access drive has been constructed which would serve the four plots, without the benefit of planning permission.

#### The proposed development

The current application is for the erection of a single dwelling with garage, and for the retention of that part of the access drive which would serve the proposed dwelling. The red line also includes a strip of land running along the western boundary which is intended to house the drainage infrastructure, which it is understood could also serve the other plots to the north.

The original application was considered unacceptable both in terms of design and impact on the neighbouring property. It was not considered that the scale of the original dwelling reflected its position adjacent to the neighbouring bungalow on a lower level. The proposals would also have resulted in unacceptable overlooking of Mayfield House to the rear.

Amended plans have therefore been submitted to address the previous concerns (see 'design' and 'living conditions' sections below).

#### **Material considerations**

Section 38(6) of the Planning and Compulsory Purchase Act 2004 provides that If regard is to be had to the development plan for the purpose of any determination to be made under the planning Acts the determination must be made in accordance with the plan unless material considerations indicate otherwise. Section 70(2) of the Town and Country Planning Act states that, in dealing with an application for planning permission the local planning authority shall have regard the provisions of the development plan, so far as material to the application; any local finance considerations, so far as material to the application; and any other material considerations.

In this instance, the development plan consists of the saved policies of the North Lincolnshire Local Plan (NLLP) and the North Lincolnshire Core Strategy (NLCS). Other material planning policy considerations include the National Planning Policy Framework (the NPPF), the emerging North Lincolnshire Local Plan and a suite of supplementary planning documents.

#### The main issues for consideration are the principle of development, design/character and appearance, living conditions, highway safety, flood risk and drainage, and contaminated land.

#### Principle of development

The site is outside the settlement boundary of Wrawby as defined in the Housing and Employment Land Allocations DPD, in an area where new housing is strictly controlled by development plan policies.

Saved local plan policy RD2 sets out that development in the open countryside will be strictly controlled. This policy only supports residential development outside defined development limits in certain circumstances, none of which apply in this case. Core strategy policies CS2, CS3 and CS8 similarly strictly limit housing development outside development boundaries to that which is essential to the functioning of the countryside.

It should be noted that the council is able to demonstrate a five-year housing land supply as identified within the North Lincolnshire Council Five Year Housing Land Supply Statement, August 2023. Therefore, full weight can be attributed to the Local Plan and Local Development Framework policies and the 'tilted balance' set out in paragraph 11(d) of the NPPF is not engaged.

The proposals therefore conflict with the development plan.

Nevertheless, the extant outline permission granted in February 2022 is a significant material consideration which indicates that permission should be granted in this specific case.

#### Design/character and appearance

Local plan policy H8 requires, amongst other things, a high standard of layout which maintains, and where possible improves and enhances the character of the area. It also seeks to protect existing natural and built features, landmarks or views that contribute to the amenity of the area.

Core Strategy policy CS2 requires a high standard of design. Development should contribute towards the creation of locally distinctive, sustainable, inclusive, healthy and vibrant communities. Policy CS5 requires good design which is appropriate to its context. Proposals should consider the relationship between any buildings and the spaces around them, and how they interact with each other as well as the surrounding area. Policy CS8 reflects this need for good design, in keeping with the character of the area.

The NPPF calls for high quality design. In particular, paragraph 130 requires, amongst other things, developments which will function well and add to the overall quality of the area; are visually attractive as a result of, amongst other things, good layout; are sympathetic to local character and history, including the surrounding built environment and landscape setting; establish or maintain a strong sense of place; and create places that are safe, inclusive and accessible and which promote health and well-being, with a high standard of amenity for existing and future users. The NPPF is supported by the National Design Guide (NDG) which forms part of the government's planning practice guidance. Amongst other things, the NDG sets out 10 characteristics including 'context', 'identity' and 'built form'. Together, these particular characteristics require development that enhances its surroundings, is attractive and distinctive and which results in a coherent pattern of development.

The dwelling is shown on the block plan as broadly in the same location as plot 1 on the layout which was permitted as part of the outline permission granted in 2022.

The original scheme submitted was not considered to respect the character of the area in terms of its form, scale and elevational treatment, bearing in mind that Mayfield House to the rear is a 1.5-storey dwelling and to the north is a bungalow. To address those design concerns an amended scheme was submitted showing the main bulk of the house as a 1.5-storey dwelling with dormer windows and a two-storey projection to the front. To the west is a garage with room above, served by a dormer window to the front and rooflights to the rear. In design terms this proposal is considered to better reflect the character of this particular part of the village and the sloping land to the rear of the existing settlement.

The materials would be a mix of brick and off-white render for the walls, and dark coloured roofing tile. The suggested tile would not match existing roofs in the area which are predominantly red Roman type tiles or slate. The applicant's agent has confirmed a dark colour is preferred for the roof and in this case a natural or good quality synthetic slate would be appropriate. Details of this can be secured by condition.

Overall, the amended design is considered to address the previous concerns and is acceptable in light of local and national policies requiring good design.

#### Living conditions

Paragraph 130(f) of the NPPF requires new development to create places which, amongst other things, promote health and wellbeing, with a high standard of amenity for existing and future users. Paragraph 185 provides that planning policies and decisions should also ensure that new development is appropriate for its location taking into account the likely effects

(including cumulative effects) of pollution on health, living conditions and the natural environment, as well as the potential sensitivity of the site or the wider area to impacts that could arise from the development.

Local plan policy H5 development requires that new housing development does not result in overlooking or a loss of privacy to existing developments, or any other loss of amenity to existing dwellings. Core Strategy policy CS5 requires new development to consider the relationship between any buildings and the spaces around them, and how they interact with each other as well as the surrounding area.

In terms of future occupiers, the dwelling would provide adequate accommodation/natural light. The existing bungalow to the south is on a higher level and, given the scale and nature of the proposed side wall of the new dwelling (as amended), there would be no undue impacts on the amenity of the bungalow.

The relationship between the proposed dwelling and the neighbour to the east is also acceptable bearing in mind the distances involved and the mature intervening hedgerow and trees between them.

The original scheme raised significant issues in terms of overlooking of the garden of Mayfield House, to the east. The original proposals showed a two-storey rear projection with a balcony within close proximity to the common boundary. The scale of the amended scheme is much reduced with the balcony element removed. Whilst there are dormer windows and rooflights on the rear elevation of the proposed dwelling, they are a minimum of 12.5m from the common boundary which is considered acceptable in this context. Furthermore, those dormers closest to the rear of the neighbouring property serve an en-suite and a bathroom. The rooflights would serve a master bedroom.

Overall it is considered that there would be no undue impacts on the living conditions of surrounding properties.

#### Highway safety

Local plan policy T2 requires all development to be provided with a satisfactory access. The NPPF, at paragraph 100(b), requires safe and suitable access to the site to be achieved for all users.

The access drive to serve the outline permission has already been installed, albeit seemingly without permission. In dealing with the most recent outline permission, it was reported that 'The traffic generation created by an additional four dwellings would not, in planning terms, represent a significant increase and the proposal includes improvements to the access, which will afford a visibility splay that conforms with the requirements of Manual for Streets.'

The highways officer has been consulted on the current application and raises no objection subject to the conditions applied to the previous outline permission. Some of those conditions are not necessary or relevant for this full application and where necessary have been omitted or amended as appropriate.

#### Flood risk and drainage

Local plan policy DS16 and Core Strategy policy CS19 reflect the advice in section 14 of the NPPF which aims to direct development to areas of lowest flood risk. Paragraph 159 of the

NPPF similarly states that inappropriate development in areas at risk of flooding should be avoided by directing development away from areas at highest risk.

The site falls inside flood zone 1, the area at least risk of flooding. The extant outline application was subject to a requirement for a drainage scheme that would have served all four properties granted under that permission.

The LLFA has again suggested that this is the preferred approach. Whilst this is of course the preferable solution if four dwellings are constructed, we are currently looking at a full application for a single dwelling. If this development proceeds, then the outline permission will fall away and there is no certainty the rest of the scheme would come forward; therefore, a condition requiring a drainage scheme for a larger development would not be reasonable.

Notwithstanding this, an outline drainage strategy has been submitted which advises that it has been confirmed by the representative of the current landowner and future owner of plot 4 that the existing pond in the northwest corner of the (outline) site will remain in the ownership of plot 4 and can be utilised for the disposal of surface water from all four plots. The pond has a connection and outlet into the watercourse system and this outlet will remain in its current form and size. An alternative condition has been agreed with the LLFA to reflect the current circumstances, requiring a drainage scheme to be agreed and implemented before occupation of the dwelling.

Overall, the site is not at risk of flooding and, subject to an appropriate drainage scheme, is capable of being developed without unacceptable impacts on others.

#### **Contaminated land**

Policy DS7 of the North Lincolnshire Local Plan sets out that permission will only be granted on contaminated sites where a detailed site survey has been submitted, and a suitable scheme of remedial measures has been agreed to overcome any existing contamination. Paragraph 178 of the NPPF states that planning decisions should ensure that a site is suitable for its proposed use, taking account of ground conditions and any risks arising from land instability and contamination.

A phase 1 desk study report (for the outline site for four dwellings) has been submitted which identifies potential for pollutants on the site. The Environmental Protection Officer has been consulted and raises no objection subject to a condition requiring a remediation scheme to be approved and implemented.

#### Overall planning balance and conclusions

Whilst the proposal is for housing development on a site outside the settlement boundary of Wrawby, the extant outline planning permission is a significant material consideration which indicates that permission can be granted in this case otherwise than in accordance with the development plan.

The proposals would result in minor benefits in terms of providing an additional dwelling to the council's housing land supply, economic benefits during construction and post occupation, and through taxation.

The amended proposals would be acceptable in terms of design and there would be no undue impacts on surrounding property. Other technical planning issues can be addressed, where necessary, by appropriate conditions as outlined above.

In light of the above, the application is recommended for permission, subject to the conditions set out below.

#### **Pre-commencement conditions**

The pre-commencement conditions included in the recommendation have been agreed with the agent.

#### **RECOMMENDATION** Grant permission subject to the following conditions:

1.

The development must be begun before the expiration of three years from the date of this permission.

#### Reason

To comply with section 91 of the Town and Country Planning Act 1990.

2.

The development hereby permitted shall be carried out in accordance with the following approved plans:

- Drawing number 22-526 100 Revision D (Site Location Plan and Block Plan)
- Drawing number 22-526 200 Revision E (Proposed Layouts and Elevations)
- Drawing number 22-526 102 Revision A (Site Long Section).

#### Reason

For the avoidance of doubt and in the interests of proper planning.

#### 3.

The walling of the dwelling hereby permitted shall be constructed of materials as shown on drawing number 22-526 - 200 Revision D (Proposed Layouts and Elevations). The roofing shall be completed in accordance with details of materials which have first been submitted to and approved inwriting by the local planning authority.

#### Reason

In the interests of good design.

4.

The existing vehicular access to the site shall be improved within highway limits in accordance with details to be submitted to and approved in writing by the local planning authority.

#### Reason

In the interests of highway safety and to comply with policy T19 of the North Lincolnshire Local Plan.

#### 5.

The dwelling hereby permitted shall not be first occupied until the proposed parking facilities have been provided in accordance with the approved plans. The parking spaces shall thereafter be retained, available for the parking of vehicles, for the lifetime of the development.

#### Reason

In the interests of good planning and highway safety and to comply with policies T2 and T19 of the North Lincolnshire Local Plan.

#### 6.

The dwelling hereby permitted shall not be first occupied until the private driveway has been completed up to its junction with the vehicular access to that dwelling in accordance with details which have first been approved in writing by the local planning authority. The private driveway shall thereafter be maintained in accordance with the approved details for the lifetime of the development.

#### Reason

In the interests of highway safety and to comply with policies T2 and T19 of the North Lincolnshire Local Plan.

#### 7.

No loose material shall be placed on the access driveway serving the site within 10 metres of the adopted highway.

#### Reason

In the interests of highway safety and to comply with policy T19 of the North Lincolnshire Local Plan.

8. No development shall take place until a construction phase traffic management plan showing details of:

- (i) a pre/post construction condition survey of the carriageway to identify any defects and how they will be rectified;
- (ii) all associated traffic movements, including delivery vehicles and staff/construction movements;
- (iii) any abnormal load movements;
- (iv) contractor parking and welfare facilities;
- (v) storage of materials; and
- (vi) traffic management requirements, including the means of controlling the deposition of mud onto the adjacent highway, along with appropriate methods of cleaning the highway, as may be required;

has been submitted to and approved in writing by the local planning authority. Once approved the plan shall be implemented, reviewed and updated as necessary.

#### Reason

In the interests of highway safety and to comply with policy T19 of the North Lincolnshire Local Plan.

#### 9.

Within three months of the commencement of development, the applicant or their successor in title shall submit a biodiversity metric assessment and biodiversity management plan to the local planning authority for approval in writing. The plan shall include:

- (a) details of measures to avoid harm to great crested newts, hedgehogs, bats and nesting birds during demolition, vegetation clearance and construction works;
- (b) details of habitat and hedgerow creation, enhancement and ongoing management measures required to deliver a net gain in biodiversity units of at least 1% in accordance with the Defra Small Sites Metric;
- (c) details of bird nesting and bat roosting features to be installed on the new buildings;
- (d) restrictions on lighting to avoid impacts on bat roosts, bat foraging areas, bird nesting sites and sensitive habitats;
- (e) provision for hedgehogs to pass through any fencing installed between gardens and between areas of grassland
- (f) prescriptions for the retention, planting and aftercare of trees and shrubs of high biodiversity value;
- (g) proposed timings for the above works in relation to the completion of the building; activity/development will require a licence.

Biodiversity units shall be delivered on site, within the red line and blue line boundaries shown on the submitted Location Plan.

#### Reason

To conserve and enhance biodiversity in accordance with policies CS5 and CS17 of the Core Strategy.

10.

The biodiversity management plan approved under condition 9 above, shall be carried out in accordance with the approved details and timings, and the approved features shall be retained thereafter. Prior to the occupation of the dwelling hereby permitted, the applicant or their successor in title shall submit a report to the local planning authority, providing evidence of compliance with the biodiversity management plan.

#### Reason

To conserve and enhance biodiversity in accordance with policies CS5 and CS17 of the Core Strategy.

11.

Unless otherwise agreed by the local planning authority, development other than that required to be carried out as part of an approved scheme of remediation must not Unless otherwise agreed by the local planning authority, development other than that required to be carried out as part of an approved scheme of remediation must not commence until parts 1 to 4 below have been complied with. If unexpected contamination is found after development has begun, development must be halted on that part of the site affected by the unexpected

contamination to the extent specified by the Local Planning authority in writing until part 4 has been complied with in relation to that contamination.

#### Part 1: Site Characteristics

A Phase 1 desk study shall be carried out to identify and evaluate all potential sources of contamination and the impacts on land and/or controlled waters, relevant to the site. The desk study shall establish a 'conceptual model' of the site and identify all plausible pollutant linkages. Furthermore, the assessment shall set objectives for intrusive site investigation works/Quantitative Risk Assessment (or state if none required). Two full copies of the desk study and a non-technical summary shall be submitted to the local planning authority for approval prior to proceeding to further site investigation. An investigation, must be completed in accordance with a scheme to assess the nature and extent of any contamination on the site, whether or not it originates on the site. The contents of the scheme are subject to the approval in writing of the local planning authority. The investigation and risk assessment must be undertaken by competent persons and a written report of the findings must be produced. The written report is subject to the approval in writing of the findings must include:

- (i) a survey of the extent, scale, and nature of contamination;
- (ii) an assessment of the potential risks to:
  - human health;
  - property (existing or proposed) including buildings, crops, livestock, pets, woodland, and service lines and pipes;
  - adjoining land;
  - groundwaters and surface waters;
  - ecological systems;
  - archaeological sites and ancient monuments;
- (iii) an appraisal of remedial options, and a proposal of the preferred option(s). This must be conducted in accordance with Environment Agency's Land Contamination Risk Management (LCRM) guidance July 2023.

#### Part 2: Submission of Remediation Scheme

A detailed remediation scheme to bring the site to a condition suitable for the intended use by removing unacceptable risks to human health, buildings and other property and the natural and historical environment must be prepared and is subject to the approval in writing of the local planning authority. The scheme must include all works to be undertaken, proposed remediation objectives and remediation criteria, timetable of works and site management procedures. The scheme must ensure that the site will not qualify as contaminated land under Part 2A of the Environmental Protection Act 1990 in relation to the intended use of the land after remediation.

#### Part 3: Implementation of Approved Remediation Scheme

The approved remediation scheme must be carried out in accordance with its terms prior to the commencement of development other than that required to carry out remediation, unless otherwise agreed in writing by the local planning authority. The local planning authority must be given two weeks' written notification of commencement of the remediation scheme works.

Following completion of measures identified in the approved remediation scheme, a verification report (referred to in PPS23 as a validation report) that demonstrates the effectiveness of the remediation carried out must be produced and is subject to the approval in writing of the local planning authority.

#### Part 4: Reporting of Unexpected Contamination

In the event that contamination is found at any time when carrying out the approved development that was not previously identified it must be reported in writing immediately to the local planning authority. An investigation and risk assessment must be undertaken in accordance with the requirements of Part 1, and where remediation is necessary a remediation scheme must be prepared in accordance with the requirements of Part 2, which is subject to the approval in writing of the local planning authority.

Following completion of measures identified in the approved remediation scheme a verification report must be prepared, which is subject to the approval in writing of the local planning authority in accordance with Part 3.

#### Reason

To ensure the site is safe for future users and construction workers.

12.

The dwelling hereby permitted shall not be occupied until a detailed surface water drainage scheme for the site has been fully implemented in accordance with details which have first been submitted to and approved in writing by the local planning authority. The surface water drainage scheme shall be based upon the submitted Outline Sustainable Drainage Strategy, prepared by Roy Lobley, Issue No: 1, dated: 20/06/2023 and shall fully address overland flow flood risk and surface water drainage for the existing and proposed access road leading to all properties. The drainage scheme shall demonstrate that surface water run-off generated up to and including the 1 in 100-year critical storm (including an allowance for climate change which should be based on current national guidance) will not exceed the run-off from the existing site. It shall also include details of how the resulting completed scheme is to be maintained and managed for the lifetime of the development which shall include the arrangements for adoption by any public authority or statutory undertaker and any other arrangements to secure the operation of the scheme throughout its lifetime so that flood risk, both on and off the site, is not increased. SuDS must be fully considered in accordance with current PPG guidance. Reference should be made to North Lincolnshire Council's SuDS and Flood Risk Guidance Document. Should infiltration not be feasible at the site, alternative sustainable drainage should be used, focusing on above-ground solutions.

#### Reason

To prevent the increased risk of flooding to themselves and others, to improve and protect water quality, and to ensure the implementation and future maintenance of the sustainable drainage structures in accordance with policy DS16 of the North Lincolnshire Local Plan, policies CS18 and CS19 of the North Lincolnshire Core Strategy, and paragraphs 159 to 169 of the National Planning Policy Framework.

#### 13.

No development shall commence until the local planning authority has been provided with either:

- (a) a licence issued by Natural England pursuant to Regulation 55 of The Conservation of Habitats and Species Regulations 2017 authorising the specified development to go ahead; or
- (b) a statement in writing from the relevant licensing body to the effect that it does not consider that the specified activity/development will require a licence.

## Reason

To conserve great crested newts in accordance with saved policy LC5 of the North Lincolnshire Local Plan and policy CS17 of the Core Strategy.

## Informatives

1.

In determining this application, the council, as local planning authority, has taken account of the guidance in paragraph 38 of the National Planning Policy Framework in order to seek to secure sustainable development that improves the economic, social and environmental conditions of the area.

2.

The development hereby granted planning permission requires works to be carried out within the limits of the adopted (public) highway. Therefore:

- before ANY construction works take place within the limits of the highway you MUST contact the highway authority on telephone number 01724 297000 to arrange for the relevant permissions/licenses to be issued;
- before ANY service (utility) connections take place within the limits of the highway you MUST contact the highway authority on telephone number 01724 297319 to arrange for the relevant permissions/licenses to be issued.

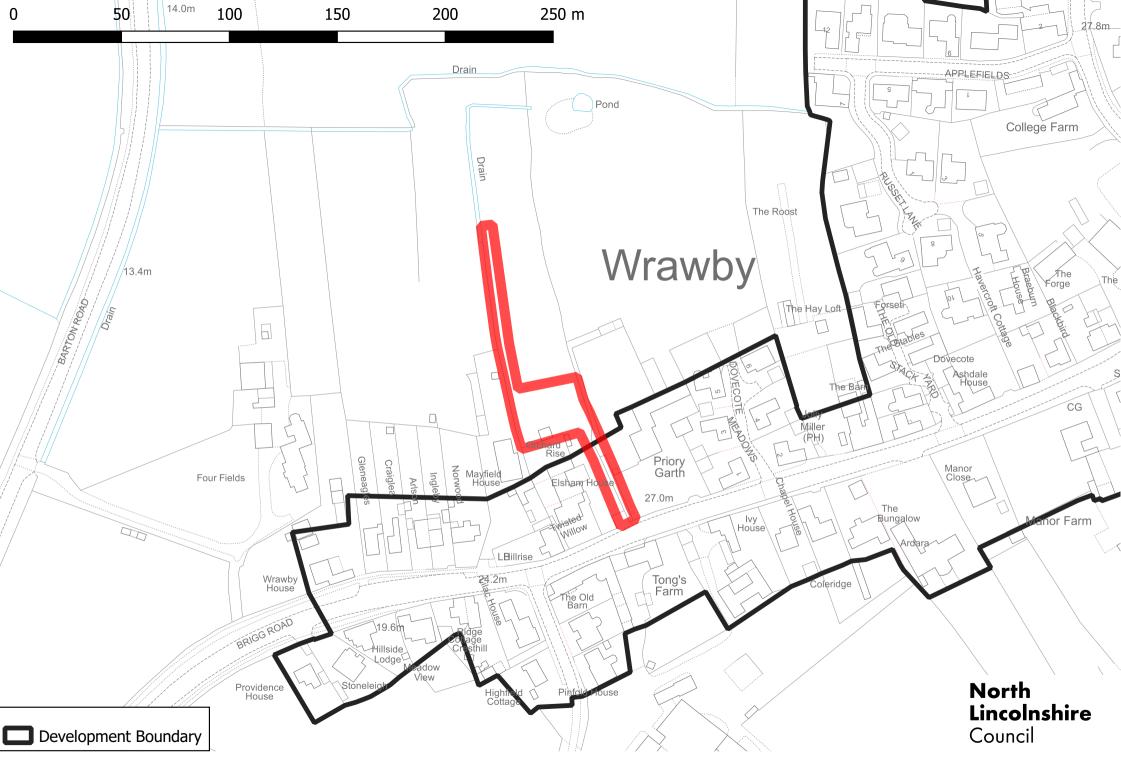

## 3.

Our records indicate that the proposed development site is bounded by, or has running through it, a watercourse (surface water pipe/culvert or ditch). Following inspection, the watercourse may need to be cleared, replaced, protected or diverted by the landowner at their expense in accordance with their riparian responsibilities. An easement adjacent to the watercourse may need to be provided for future maintenance. Any other drainage feature found during excavations must be immediately reported to the LLFA Drainage Team, via email to Ilfadrainageteam@northlincs.gov.uk prior to any further construction works being carried out. Please refer to North Lincolnshire Council's 'Guide to Watercourses and Riparian Ownership' detailing riparian rights and responsibilities. Compliance with this guidance is to ensure the free flow of surface water is maintained throughout the development.

4.

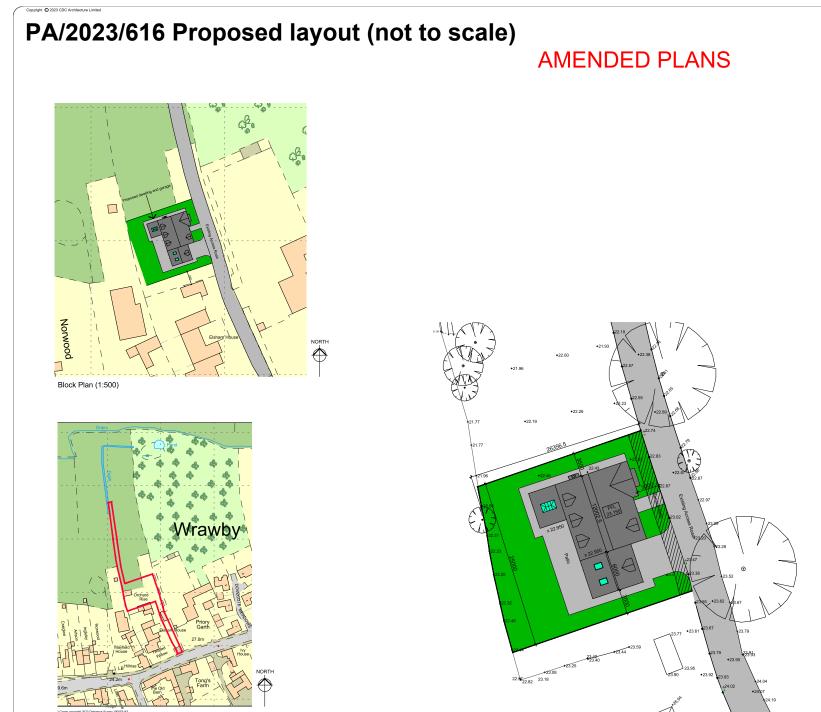

Alterations and/or connections into the watercourse must be consented by North Lincolnshire Council's LLFA Drainage Team, in their capacity as Lead Local Flood Authority, through an

Ordinary Watercourse Consent and appropriate discharge rates must be agreed. Please contact the LLFA Drainage team via email to Ilfadrainageteam@northlincs.gov.uk for further details. Compliance with this guidance is to ensure the free flow of surface water is maintained throughout the development.
