COVID-19 vaccination programme for North Lincolnshire

North Lincolnshire
Clinical Commissioning Group

- All 4 PCN sites have and continue to deliver the COVID-19 vaccination programme in collaboration with their general practices. The first site went live in December 2020
- Excellent rollout of the vaccination programme across the care home sector with exceptional uptake for residents and very good progress made for care home staff. Ongoing bespoke work to target those where uptake for staff and residents requires additional support.

COVID-19 vaccination programme for North Lincolnshire

North Lincolnshire
Clinical Commissioning Group

Baths Hall mass vaccination site established 19th March which has been very successful and delivered 25,000 vaccines to date

Collaboration with the acute hospital hub in the early phase of the vaccine rollout to coordinate and support health and social care staff to ensure high uptake of the vaccine. The hospital hub has since closed down following the successful vaccination for health and social care staff

System wide collaboration and support to implement pharmacy sites and a mass vaccination site within North Lincolnshire to increase the flexibility, convenience and uptake for the local population

Second doses have been brought forward from 12 weeks to 8 weeks in line with national guidance

System wide communication and engagement strategy that has been refreshed as the programme has developed.

COVID-19 Vaccination Programme for North Lincolnshire

North Lincolnshire
Clinical Commissioning Group

Reducing the inequalities gap in relation to the vaccine programme has been a key focus throughout the vaccine programme and something North Lincolnshire can be particularly proud of. Some highlights include:

More than 20 YouTube videos in different languages were produced by local clinicians to encourage confidence and uptake in the vaccination programme

Thousands of vaccination flyers promoting local delivery were distributed across our most deprived wards where uptake was at its lowest (data driven intelligence)

Vaccine pop-up clinics taken into workplaces with large and diverse workforces – such as Two Sisters and Wren Kitchens. To date, we have vaccinated almost 500 employees at the latter site.

Vaccine pop-up sessions delivered within local faith buildings such as Sikh temples and Islamic mosques

Pop-up sessions delivered across eight settings for the homeless and rough sleeping community

Pop-up sessions continue to be delivered across ward areas with lowest uptake and areas of highest deprivation – namely in busy locations of Crosby and Park and the town centre

Maximised our contacts in the community and COVID-19 Champions to encourage positive vaccine communications

Persistent positive media coverage of our initiatives which breeds widespread confidence in both the vaccine and our ability to implement a safe and effective programme.
